A Leader in e-Learning

Martech offers a highly animated and interactive library of technical e-learning that will take your employees through the theoretical portion of their professional development before they experience hands-on training in a learning laboratory or on the job site.

- 100 Safety, Health, and Plant Science
- 200 Mechanical Maintenance
- 300 Electrical Transmission and Distribution
- 400 Electrical Maintenance
- 500 Power Generating Systems and Operation
- 600 Instrumentation and Control
- 700 Process Systems and Operations
- 800 Industrial Machining and Welding

119 Hazard Communications
119-03 Hazardous Communications Employee Training Program, Part 1
119-04 Hazardous Communication Employee Training Program, Part 2
119-06 Hazard Communication Programs in the Workplace
119-07 Exposure to and Detection of Hazardous Chemicals
119-08 Physical, Health, and Environmental Hazard Classes
119-09 Labeling and SDS for Hazardous Chemicals

140 Qualified Electrical Worker
140-01 General Concepts and Job Briefings
140-04 Enclosed Spaces
140-09 Electrical Clearances
140-11 Mechanical Equipment
140-18 Dog Bite Prevention

150 Environmental Awareness
150-01 Environmental Awareness
150-02 Stormwater Regulations and Pollution Prevention Plans
150-03 Spill Prevention, Control, and Countermeasures

160 Construction Safety
160-01 Health Hazards in Construction
160-02 Scaffolding Safety for Construction
160-03 Portable Power and Hand Tool Safety for Construction
160-04 Materials Handling and Storing Safety for Construction
160-05 Personal Protective Equipment for Construction, Part 1
160-06 Personal Protective Equipment for Construction, Part 2
160-07 Excavation and Trenching Safety for Construction

170 Industrial Mathematics
170-01 Introduction to Industrial Math
170-02 Industrial Math: Measurements and Calculations
170-03 Industrial Math: Fractions, Percentages, and Ratios

171 Industrial Sciences
171-01 Atomic Structure and Chemical Bonding
171-02 Introduction to the Periodic Table of Elements
171-03 Chemical Formulas, Reactions, and Solubility
171-04 Introduction to Hydrocarbon Chemistry
171-05 Chemical Equations
171-10 Introduction to Physics: Force and Motion
171-11 Introduction to Physics: Energy, Work, and Power

122 Transportation
122-01 Driving Safety Practices
122-02 Drug and Alcohol Awareness

130 Behavior Based Safety Training
130-01 Behavior Based Safety Programs
130-02 Behavior Based Safety Program Concepts
130-03 Hazardous Material Procedures
130-04 Confined Space Procedures
130-05 Hot Work Procedures
130-06 Root Cause Analysis
130-07 Safety and Health Programs

131 Ergonomics
131-01 Ergonomics in an Office Environment
131-02 Ergonomics in an Industrial Environment
131-03 Proper Lifting Techniques

200 Mechanical Maintenance
201 Introduction to Industrial Maintenance and the Tools of the Trade
201-01 Working Principles of Simple Machines
201-02 Hand Tools, Part 1
201-03 Hand Tools, Part 2
201-04 Portable Power Tools
201-05 Torque Wrenches

202 Belt Drive Maintenance
202-01 Introduction to Belt Drive Maintenance
202-02 V-Belts
202-03 Positive Traction Belt Drives
202-04 Sheave Maintenance
202-05 Introduction to Conveyor Systems
202-06 Conveyor System Designs
202-07 Conveyor Belt System Inspection and Operation
202-08 Conveyor Belt Installation and Repair

203 Bearing Maintenance
203-01 Introduction to Bearings
203-02 Rolling Contact Bearings
203-03 Sliding Surface Bearings
203-04 Bearing Installation and Removal
203-05 Bearing Seals
203-06 Troubleshooting Bearing Failures

## Electrical Transmission and Distribution

### 300-01 Distribution Systems
- **301-02** Electrical Distribution System Fundamentals
- **301-03** Primary and Secondary Distribution Systems
- **301-04** Distribution System Components and Application
- **301-05** Characteristics of Distribution Switchgear
- **301-06** Load Characteristics and Management
- **301-07** Principles of Revenue Metering
- **301-08** Single and Poly-phase Metering

### 345 Introduction to NERC
- **345-01** NERC Overview and Application for Generator Operators

### 350 System Protection
- **350-01** Elements of System Protection
- **350-02** Types of Protective Relays
- **350-03** Monitoring System Conditions
- **350-04** Disturbance Monitoring Equipment
- **350-05** Line Protection
- **350-06** Transformer Protection
- **350-07** Pilot Protection
- **350-09** Bus Protection
- **350-10** Generator Protection
- **350-11** Protection System Misoperation and Maintenance
- **350-12** Protection Systems Maintenance Programs

### 375 Resource and Demand Balancing
- **375-01** Real Power Balancing Control Performance
- **375-02** Disturbance Control Performance
- **375-03** Frequency Response and Bias
- **375-05** Automatic Generation Control

### 376 Communications
- **376-01** Bulk Power System Communication Basics
- **376-02** Bulk Power System Communication and Coordination
- **376-03** Power System Dispatching (In Production)

### 377 Critical Infrastructure Protection
- **377-01** CIP Personnel Responsibilities
- **377-02** CIP Perimeters and Configurations
- **377-03** Controls and Management
- **377-04** CIP Related BES Recovery Plans
- **377-05** CIP Physical Security

### 378 Emergency Operations Planning
- **378-01** Emergency Policies and Procedures
- **378-02** Capacity and Energy Emergencies

### 381 Interconnection Reliability Operations and Coordination
- **381-05** Reliability Coordination - Planning and Operations
- **381-06** Coordinating Entities and Duties

### 386 Transmission Operations
- **386-01** Reliability Responsibilities and Authorities

### 387 System Operations
- **387-01** Energy Production and Transfers
- **387-02** Transmission Operations
- **387-03** Economic Power System Operations
- **387-04** Power System Control Elements
- **387-05** Interconnected Energy Accounting
- **387-06** Power System Telemetry and Telemetering Methods (In Production)
- **387-07** Supervisory Control and Data Acquisition (SCADA) Systems Basics
- **387-08** Factors of Power System Reliability (In Production)
- **387-09** Power System Stability and Protection Fundamentals (In Production)
- **387-10** Power System Restoration

### 388 Active and Reactive Power
- **388-01** Active and Reactive Power Fundamentals
- **388-02** Active and Reactive Power Limits and Flows
**400** Electrical Maintenance

401 Direct Current (DC)
- 401-01 Electron Theory
- 401-02 Magnetism and Electromagnetism Explained
- 401-03 Ohm’s and Kirchhoff’s Laws Relating to DC Circuits
- 401-04 Evaluating Series and Parallel DC Circuit Performance
- 401-05 Determine Circuit Outputs from Specified Inputs

402 Alternating Current (AC)
- 402-01 Introduction to Alternating Current (AC)
- 402-02 Ohm’s and Kirchhoff’s Laws Involving AC Circuits
- 402-03 Inductance in AC Circuits
- 402-04 Capacitance in AC Circuits
- 402-05 Impedance in AC Circuits
- 402-06 AC Power
- 402-07 Fundamentals of 3-Phase AC

405 Power Quality
- 405-01 Power Quality
- 405-02 Harmonics
- 405-03 High-voltage AC

409 Industrial Motors
- 409-01 AC Induction Motors
- 409-02 AC Generators
- 409-03 AC Induction Motor Theory
- 409-04 Troubleshooting AC Induction Motors
- 409-05 AC Induction Motor Maintenance
- 409-06 Overhauling Induction Motors
- 409-07 Generator System Heat Protection
- 409-08 Generator Overhaul
- 409-09 DC Motors and Generators
- 409-10 Maintenance of Direct Current Motors and Generators

411 Motor Control and Protection
- 411-01 Introduction to Motor Controls
- 411-02 Motor Protection and Faults
- 411-03 Motor Control Troubleshooting
- 411-04 Motor Control Centers

413 AC Drives
- 413-01 AC Drives Overview

415 Transformers
- 415-01 Transformer Basics
- 415-02 Transformer Design and Components
- 415-03 Transformer Connections
- 415-04 Special Transformers

416 Batteries, Battery Chargers, and UPS
- 416-01 Battery Basics
- 416-02 Electrical Backup Systems
- 416-03 Uninterruptable Power Supplies

417 Switchgear Maintenance
- 417-01 Switchgear
- 417-02 Low Voltage Breakers
- 417-03 Medium and High Voltage Switchgear
- 417-04 General Switchgear Maintenance
- 417-05 Switchgear Specific Maintenance Procedures
- 417-06 Circuit Breaker Time Travel
418  Electrical Protection and Grounding
418-01 Electrical Faults and Current Ratings
418-02 Overcurrent Protection, Fuses and Breakers
418-03 Protection Relays
418-04 Generator, Transformer, and Motor Protection
418-05 Grounding and Bonding

419  Motor Operated Valves
419-01 MOV (Motor Operated Valve) Application and Construction
419-02 MOV Disassembly and Inspection, Part 1
419-03 MOV Disassembly and Inspection, Part 2
419-04 Limit Switch Adjustment

421  Wiring Installation
421-01 Wire and Cable Management
421-02 Terminating and Connecting Wires in a Control Panel
421-03 Making Connections in a Junction Box
421-04 Installing Conduit and Pulling Wire

423  Cable Splicing
423-01 Introduction to Medium Voltage Cable Splices and Terminations
423-02 Medium Voltage Splices and Terminations

425  Troubleshooting Electrical Circuits
425-01 Troubleshooting AC Circuits
425-02 Troubleshooting DC Circuits

427  Freeze Protection
427-01 Electrical Freeze Protection Components and Application

500  Power Generating Systems and Operations

501  Power Generation
501-01 Energy Conversions
501-02 Steam Turbine Basics
501-03 Combustion System Component Overview
501-04 Boiler Water and Steam Cycle Overview
501-05 Generator Overview

505  Turbine Auxiliaries System and Control
505-01 Steam Turbine Design
505-02 Steam Turbine Control and Operation
505-03 Steam Turbine Auxiliaries
505-10 Steam Turbine Governor System

507  Generator Auxiliaries and System Control
507-01 Generator and Auxiliary Systems’ Functions
507-02 Generator and Auxiliary Systems’ Flow Paths and Major Components
507-03 Generator Construction and Process Control
507-04 Generator and Auxiliary Systems Start-up
507-05 Generator and Auxiliary Systems’ Normal Operations
507-06 Generator and Auxiliary Systems’ Shutdown
507-07 Generator and Auxiliary Systems’ Functions (50 Hz) (In Production)
507-13 Generator Construction and Process Control (50 Hz) (In Production)

511  Combustion Turbine Fundamentals
511-01 Gas Turbine Fundamentals and Configuration of Generating Facilities
511-02 Introduction to the GE LM Series Gas Turbine
511-03 Introduction to GE Frame Series Gas Turbines
511-04 Introduction to the Siemens V-Series Gas Turbine
511-05 Heavy Duty Gas Turbines – Major Components and Support Systems
511-07 Aero-derivative Gas Turbines – Major Components and Support Systems
511-10 Fundamentals of Gas Turbine Operation and Routine Maintenance
511-11 Overview of Gas Turbine Control Schemes
511-12 Gas Turbine Fuel and Combustion Systems
511-13 Gas Turbine Lube Oil and Control Oil Systems
511-14 Gas Turbine Air Systems
511-15 Gas Turbine Water Wash and Drain System
521 Combustion Air and Flue Gas System
521-01 Introduction to Combustion Air and Flue Gas Systems
521-02 Combustion Air and Flue Gas Flow Paths and Components
521-03 Control Loops and Methods of Control
521-04 Combustion Air and Flue Gas System Start-up
521-05 Maintaining Fan Operations in Combustion Air and Flue Gas Systems
521-06 Combustion Air and Flue Gas System Shutdown Process

522 Coal Handling
522-01 Coal Handling System

523 Boiler Fuel Systems
523-01 Boiler Fuel System Function
523-02 Process and Methods of Control for the Boiler Fuel System
523-03 Boiler Fuel System Start-up
523-04 Normal Operation of the Boiler Fuel Systems
523-05 Shutdown for the Boiler Fuel System

531 Hydrocarbon Fired Boilers
531-01 Combustion Theory
531-02 Basic Boiler Design
531-03 Boiler Valves and Steam Fittings
531-04 Boiler Fuel and Air Systems
531-05 Boiler Water and Steam Cycle
531-06 Boiler Heat Recovery Systems
531-07 Scrubbers and Ash Removal Systems
531-08 Boiler Operator Roles and Responsibilities

533 Boiler Firing Controls and Components
533-01 Fuel Combustion and Controls
533-02 Boiler Burner Controls and Management

535 Fundamental Aspects of Emission Controls
535-01 Flue Gas Desulfurization System
535-02 Flue Gas Desulfurization, Open Spray Design, Part 1
535-03 Flue Gas Desulfurization, Open Spray Design, Part 2
535-04 Dry Scrubber Operation Lesson
535-05 Selective Catalytic Reduction (SCR) System
535-06 Continuous Emission Monitoring
535-07 Fundamentals of Using a CEMS
535-08 Calibration of CEMS Components

551 Circulating Water System
551-01 Introduction to the Circulating Water System
551-02 Function of the Circulating Water System
551-03 Circulating Water System Components
551-04 Circulating Water System Start-Up
551-05 Circulating Water System Normal Operations
551-06 Circulating Water System Shutdown
551-07 Circulating Water System Controls
551-08 Cooling Towers: Operating Principles and Design
551-09 Cooling Towers: Components
551-10 Air Cooled Condensers

553 Condensate and Feedwater Systems
553-01 Introduction to the Condensate System
553-02 Introduction to the Feedwater System
553-03 Condensate and Feedwater Systems Operation
553-04 Condensate and Feedwater System Control

555 Boiler Feed Pumps
555-01 Boiler Feed Pump and Associated Auxiliary Equipment
555-02 Boiler Feed Pump Flow Path and Major Components
555-03 Boiler Feed Pump Water Supply and Control Systems
555-04 Boiler Feed Pump Start-up
555-05 Boiler Feed Pump Daily Operations

557 Boiler Water and Steam Systems
557-01 Function of Boiler Water and Steam Systems
557-02 Flow Paths and Components of the Boiler Water and Steam Systems
557-03 Process Controls for Boiler Water and Steam Systems
557-04 Start-up Procedures for the Boiler Water and Steam Systems
557-05 Normal Operation of the Boiler Water and Steam Systems
557-06 Shutdown of the Boiler Water and Steam Systems

559 Water Treatment
559-01 Molecular Chemistry of Water
559-02 Elements and the Periodic Table of Elements
559-03 Chemical Compounds
559-04 Corrosion Causes and Effects
559-05 Corrosion Control in Steam Production
559-06 Steam Chemistry Control Guidelines
559-07 Industrial Water Treatment Systems
559-08 Introduction to Desalination
559-09 Desalination: Pre- and Post-treatment of Water
559-10 Reverse Osmosis
559-11 Thermal Desalination Technologies
560  Plant Electrical Systems
560-01  Main Transformers
560-02  Station Service System
560-03  Fuses and Circuit Breakers
560-04  Protective Relays and Instrument Transformers
560-05  Equipment Disconnects and Grounding

561  Unit Start-up and Shutdown
561-01  Preparing for Power Plant Start-ups
561-02  Power Plant Start-up Procedures
561-03  Preparing for Power Plant Shutdown
561-04  Power Plant Shutdown Procedures

563  Efficiency, Reliability, and Environmentally Sensitive Operations
563-01  Basic Power Plant Efficiency
563-02  Water and Steam: Terms and Principles
563-03  Heat Transfer Principles
563-04  Laws and Principles of Thermodynamics
563-05  Performance Parameters
563-06  Balancing Efficiency, Availability, Capability and Flexibility
563-07  Instrumentation and Controls
563-08  Boiler Efficiency
563-09  Boiler Reliability
563-10  Turbine Efficiency
563-11  Condenser Efficiency
563-12  Condenser Operation and Reliability
563-13  Feedwater Heater Operation and Efficiency
563-14  Pump Efficiency and Reliability
563-15  Environmentally Sensitive Operations

565  Plant Control System
565-01  Distributed Control System Fundamentals
565-02  Distributed Control System Components
565-03  Using Distributed Control System Diagrams
565-04  Power Plant Unit Control

567  Heat Rate Optimization
567-01  Understanding the Basic Properties of Water and Steam
567-02  Saturated Steam Tables
567-03  Superheated Steam Tables

581  Diesel Power Plant Operations
581-01  Diesel Engines for Power Generation
581-02  Diesel Engine Support Systems
581-03  Diesel-Powered Generation
581-04  Diesel Power Plant Operations
581-05  Diesel Plant Control Systems and Protective Devices
581-06  Diesel Plant Routine Maintenance

582  Combined Cycle Power Plant Operations
582-01  Combined Cycle Power Plants
582-02  Combined Cycle Power Plant Components
582-03  HRSG – Flow Path and Major Equipment
582-04  HRSG – Auxiliary Equipment and Systems
582-05  HRSG – Basic Operating Concerns and Conditions
582-06  Combined Cycle Steam and Feedwater Operating Principles
582-07  Combined Cycle Condensate and Circulating Water Systems
582-08  Combined Cycle Auxiliary Systems
582-10  Steam Turbines in a Combined Cycle Plant (In Production)
582-11  Combined Cycle Steam Turbine Control and Lube Oil Systems (In Production)
582-12  Steam Turbine Vacuum System in a Combined Cycle Plant (In Production)
### Hydroelectric Power Plant Operations
- The Hydroelectric Role in the Power System
- Hydroelectric Power Stations
- Water Management
- Hydroelectric Generators
- Generator Monitoring and Control
- Hydroelectric Plant Auxiliaries
- Mechanical Governor
- Electric Governor

### Reciprocating Engine Power Plants
- Introduction to Reciprocating Engine Power Plants
- Fundamentals of Reciprocating Engine Design
- Reciprocating Engine Auxiliary Systems
- Reciprocating Engine Electrical and Control Systems
- Reciprocating Engine Operations
- Generator Control in Reciprocating Engine Power Plants

### Biomass Energy
- Introduction to Biomass Power Plants
- Biomass and Waste to Energy Power Plants

### Nuclear Energy
- Nuclear Power Principles and Designs
- PWR and BWR Operation and Design

### Wind Energy
- Basic Wind Turbine Design
- Wind Farm Development
- Horizontal Wind Turbine Design and Operation
- Wind Energy Production

### Solar Energy
- Introduction to Solar Energy
- Solar Energy – Photovoltaic
- Solar Energy – Thermal Applications

### Process Control Variables
- Instrumentation and Control Overview
- Principles of Temperature
- Principles of Pressure
- Principles of Level
- Principles of Flow
- Temperature Instruments
- Pressure Measuring Devices
- Flow Measuring Devices

### Test Equipment
- Multimeter
- Oscilloscopes
- Power Supplies
- Signal Generators
- Temperature and Loop Calibrators
- Manometers
- Pressure and Vacuum Calibrators
- Megohmmeter

### Calibration and Troubleshooting
- Calibration Overview, Part 1
- Calibration Overview, Part 2
- Instrument Troubleshooting

### Prints and Drawings
- P&ID Basics
- Reading a P&ID
- Electrical Drawings
- Logic Diagrams
- Industrial Print Reading Overview

### Automated Control
- Introduction to Automated Control
- Pneumatic Control System
- Introduction to Switches
- Electronic Control Systems

### Signal Transmission and Conversion
- Signal Transmission
- Basic Principles of Industrial Transmitters
- Smart Transmitters
- Transducers
### Controllers and Final Control
- 617-01 Controller Control Modes
- 617-02 Operation of Automatic-Manual Transfer Stations
- 617-03 Final Control Elements
- 617-05 Advanced Control Modes (TBD)
- 617-07 Loop Tuning (In Production)

### Electronics Fundamentals
- 619-01 Introduction to Industrial Electronics
- 619-03 Electronic Components and Circuits (In Production)
- 619-07 Digital Electronics and Microprocessors

### Programmable Logic Controllers
- 621-01 Introduction to Programmable Logic Controllers (PLC)
- 621-02 Input/Output (I/O) Processing
- 621-04 PLC (Programmable Logic Controllers) Programming Instructions, Part 1
- 621-05 PLC (Programmable Logic Controllers) Programming Instructions, Part 2
- 621-06 PLC (Programmable Logic Controllers) Networks
- 621-07 PLC Network Protocols

### Principles of HVAC and Refrigeration
- 670-01 Air Conditioning Fundamentals
- 670-02 Ductless Air Conditioning
- 670-03 Introduction to Industrial Refrigeration
- 670-04 Industrial HVAC Control Systems (TBD)
- 670-05 Refrigerant System Troubleshooting
- 670-06 Chiller Design and Maintenance
- 670-07 HVAC Piping Systems (TBD)
- 670-09 Ducting and Air Movement for HVAC Systems
- 670-15 District Energy Basics

### Process Systems and Operations
#### Petroleum Refining
- 701-01 Introduction to Petroleum Refining
- 701-02 Basic Petroleum Chemistry
- 701-03 OSHA’s Process Safety Management Standard
- 701-04 History of Refining

#### Process Heaters
- 707-01 Features and Operation of Process Heaters

#### Process Tanks
- 709-01 Features and Uses of Process Tanks

#### Distillation
- 711-01 Introduction to Distillation
- 711-02 Operation of a Distillation Column

### Process Separators
- 713-01 Introduction to Process Separators

### Process Reactors
- 715-01 Introduction to Process Reactors

### Reforming and Synthesis
- 717-01 Introduction to Naphtha Reforming

### Process Safety Systems
- 719-01 Safety Alarm Systems and Instrumentation
- 719-02 Overpressure Safety Systems

### Process Utilities Systems
- 721-01 Process Utilities System, Part 1
- 721-02 Process Utilities System, Part 2

### Process Product Movement and Storage
- 723-01 Process Product Movement and Shipment
- 723-02 Tanks and Vessels Used for Storage

### Process Sampling and Testing
- 725-01 Sampling Principles and Methods
- 725-02 Testing Principles and Procedures
800  Industrial Machining and Welding

801  Precision Measurement
801-01 Intro to Measuring and Care of Measuring Tools
801-02 Measuring Rules and Tapes
801-03 Micrometers
801-04 Fixed Gauges
801-05 Measuring with Calipers
801-06 Dial Indicators
801-07 Telescoping Gauges

807  Engine Lathe
807-01 Engine Lathe

809  Surface Grinder
809-01 Surface Grinder

811  Pedestal Grinder
811-01 Pedestal Grinder

813  Bandsaw
813-01 Band Saw

815  Drill Press
815-01 Drill Press

820  Rigging, Lifting and Elevated Work Surfaces
820-01 Scaffold Erection and Components
820-02 Rigging, Part 1
820-03 Rigging, Part 2
820-04 Rigging, Part 3
820-05 Ladders
820-06 Overhead Cranes
820-07 Aerial Lift Devices

841  Welding and Cutting for Maintenance
841-01 Safe Welding and Cutting Practices
841-02 Weldability of Metals
841-03 Shielded Metal Arc Welding (SMAW)
841-04 Gas Metal Arc Welding (GMAW)
841-05 Tungsten Inert Gas (TIG) Welding
841-06 Oxyacetylene Welding (OAW)
841-08 Plasma Cutting (In Production)

About MARTECH

No one offers a more sophisticated menu of workforce training and development programs than Martech. Since 1997, we have served companies representing a number of industries—electrical generation, electrical power transmission and distribution, oil and gas production, public utilities, pulp and paper, and many other process and manufacturing industries. Each year, we deliver training to more than 30,000 employees in 20 different countries, developing competency in everything from facility operations to equipment installation, maintenance, and troubleshooting to assembly-line production to welding and other skilled trades. Our experienced in-house development team carefully tailors each program to meet our clients’ specific needs. One call to Martech puts a full menu of resources at your fingertips:

- Cutting-edge technical e-Learning
- On-site classroom and hands-on training
- Instructional design services
- Employee progression planning and apprenticeship programs
- Curriculum design and development
- Development of facility documentation and standard operating procedures
- Train-the-trainer programs
- Knowledge and skill assessments to measure competency
- Training center planning and design
- Unparalleled customer service

When you think of Martech, think of these three words:

EFFICENCY, CONVENIENCE, RESULTS

Our complete course catalog, which includes course descriptions and learning outcomes, can be downloaded from our website:
